

## **Required Items**

Lunar camera with firmware v1.02

Fully charged battery

USB cable

Computer running Windows XP (or later) or Mac OS X 10.6 (or later)

## **Procedure**

Double click to run "Lunar firmware v1.03".

Follow instructions on screen.

This firmware adds support for the AF system while recording video.

*Note: It is only possible to upgrade from firmware v1.02. If your Lunar has an older firmware version it will need to be upgraded through Hasselblad's service department.*
